World Class Solutions...

From your Gold Certified Partner for scalable, integrated and secure solutions tailored to your business needs

World Class Service...

Customization, implementation and support from your proven business solutions partner

Committed to being your Microsoft Dynamics partner

Western Computer is your world class partner for scalable, integrated, secure and easy-to-use Microsoft Dynamics solutions.

From implementation to customization to ongoing training and support, we help ensure that your business realizes the full potential of your Dynamics solution.

Our expertise lies not only in our knowledge of the latest technology available, but most importantly, in how we can tailor integrated software and hardware solutions to best meet the needs of your business.

That means helping your business to streamline processes, fuel productivity, deliver robust business intelligence and connect employees, customers and partners across a global marketplace. To do that, we give you the most powerful tools available for successful growth and to maximize the benefits of your enterprise resource planning (ERP) investment.

Navigate. Collaborate. Integrate.

Gold Certified Partner for Microsoft Dynamics

Microsoft Dynamics is an integrated, comprehensive business management solution that rapidly adapts to the unique ways you do business. Dynamics NAV and AX offer you industry-specific functionality that can streamline processes, deliver robust reporting and business intelligence, and connect customers and partners across a global marketplace. Easy to use and scalable, Microsoft Dynamics enables your team to be effective and your business to be competitive.

As a Gold Certified Microsoft Dynamics Partner, Western Computer can guide your business to the solution that best fits your needs, fully integrate it throughout your system, and implement it with minimal disruption.

Microsoft Dynamics NAV

- Provides regionally relevant and industry-specific functionality with multi-language and multi-site capabilities
- Enables robust and customizable solutions for industries including wholesale distribution, discrete and process manufacturing, supply chain management, and professional services

Microsoft Dynamics AX

- Designed for multi-national organizations, scaling to thousands of users across multiple sites
- Offers robust, fully-integrated process manufacturing solutions across multiple businesses while maintaining separate financial records

Integrated Services

Your business is unique. Your business management system should be, too. At Western Computer, we configure to meet your specific internal and external requirements, fully integrating your system with your operations.

This enables you to take full advantage of data from your Dynamics solution to best meet your specific needs using **Fusion NAV**, **SharePoint**, and Web applications.

Our gateway between Microsoft Dynamics and any device or database allows your company, customers, vendors and partners to access critical data in dashboards, reports and internal and external Web portals - all totally customizable to your specific business needs.

End-To-End Business

We take integration and customization one step further by giving you business intelligence and management tools you need to be successful, including **Bar Coding**, **E-Commerce**, **Jet Reports** and **EDI**.
